Re: Regulation of water delivery on Granite Creek and Red Cedar Creek

Dear Mr. Allred:

On August 1, 1995, we sent you a letter defining the quantity of water that Red Cedar Corporation is entitled to for irrigation. The letter stated that under Water Right No. 18-32 you are allowed to divert 2182.8 ac. ft. between April 1 and October 31 from a combination of Granite Creek and Red Cedar Creek. We consider your diversions from Granite Creek to be irrigation diversions and the use of the water for power production is an incidental use.

We recently received the attached letter from Mr. Douglass, asserting that Red Cedar Creek has been delivering 6 cfs to the reservoir and Granite Creek has been delivering at least 4 cfs to the reservoir since the beginning of April. Based on these flow rates, a total of approximately 2400 ac ft of water has been delivered as of the end of July. Mr. John Mann, Regional Engineer, has recently done a field review of the reservoir and the water situation and saw no reason to dispute this evaluation of the flows on Granite and Red Cedar Creek.

**Therefore, you are hereby informed that adequate water has been delivered to fill your Water Right No. 18-32 in full and that you have no further right to take water from Granite Creek ahead of Mr. George Douglass. Mr. Douglass, by copy of this letter, is authorized to divert water from Granite Creek up to the full measure of his water rights.**

If you have any questions concerning this regulation of water delivery, please contact me at (801)538-7380 or John Mann at (801)538-7397.

Sincerely,

Lee H. Sim, P.E.  
Assistant State Engineer  
for Adjudication and Distribution
